

Environmental Policy

Mint Fresh Services take environmental and ecological concerns extremely seriously. Therefore, we have implemented an eco-friendly approach to our cleaning services.

We recognise that we have a responsibility to the environment. This is an intrinsic part of the culture of our business and the way in which we operate. We are dedicated to regularly reviewing the impact we're having on the environment in relation to a variety of factors, such as; waste disposal, energy, water, cleaning equipment & supplies etc.

We are dedicated to using only the highest quality cleaning products while maintaining our desire to be green. Our multi surface, toilet/washroom, floor and glass cleaners are as kind to the environment as they possibly can be.

We also welcome EU regulations banning vacuum cleaners above 900w. We strictly adhere to these regulations by replacing old, outdated vacuums and providing only modern vacuums to our staff. This results in a reduction in energy usage, a quieter working environment during use & an all-round longer lasting vacuum.

Our staff are encouraged to be environmentally aware at all times. We hold Chemical Safety Data, (COSHH) Information Sheets at all times for all chemicals used. We also carry out Chemical COSHH Assessments by request.

We strive to continually improve our environmental performance and minimise the social impact and damage of activities that we carry out.
