

## Health & Safety Policy

Mint Fresh Services takes its Health and Safety responsibilities very seriously. We require our employees to have a basic understanding of Health and Safety even at the very beginning of our recruitment process. We then proceed by providing our staff with extensive information and training that is personally delivered. This process is ongoing, and we always ensure that all staff, from top to bottom of the business, are up to date with any relevant regulation changes.

We have various policies, statement and procedures that all our employees and clients alike have access to. Risk Assessments, data sheets and COSHH assessments also form part of our Health and Safety pack. Of course, we hold full Public Liability Insurance too.
